Spital Clinic Boli Infectioase “Sf. Parascheva” Iasi

Laborator analize medicale

RAPORT DE ACTIVITATE L LUNA IUNIE 2013

Total analize efectuate	**39331**
Microbiologie I	**18331**
Microbiologie II	**3944**
Hematologie	**3405**
Imunologie/ serologie	**539**
Biochimie	**12794**
Biologie moleculara	**318**

Defalcarea pe sectiile spitalului, pe spitalizari continue/spitalizari de zi si tipuri de analize, este anexata la raport.

Analize propuse pentru acreditare de catre Consiliul medical in anul 2011, pentru care au fost cereri din partea spitalului, dar care nu au putut fi executate deoarece nu s-au achizitionat reactivii corespunzatori au fost:

- Teste imunocromatografice pentru antigen HBs si anticorpi anti HCV
- Teste imunocromatografice pentru diagnosticul mononucleozei infectioase
- Teste imunocromatografice pentru diagnosticul infectiei cu Helicobacter pylori
- Teste latex aglutinare pentru identificarea Rotavirusurilor din Materiile fecale
- Acid uric
- HDL si LDL Colesterol

Analize care nu s-au putut executa deoarece aparatele au fost deconectate pe perioada efectuarii reparatiilor in spatiile de lucru ale laboratorului (analize care in continuare nu vor putea fi executate deoarece calculatoarele necesare programelor lor de functionare sunt defecte sau avariate):

- Teste ELISA
- Hemoculturi in sistemul Bactaalert (sistem de alertare vizuala si sonora a hemoculturilor pozitive)

Analize care nu s-au executat deoarece nu au mai fost cereri din partea spitalului (cu toate ca au fost propuse pentru acreditare de catre Consiliul medical in anul 2011):

- Teste detectare Factori reumatoizi

Analize nou introduse din luna Iunie:

- Teste imunocromatografice pentru detectarea Toxinei A&B Clostridiun difficile din materiile fecale

Disfunctionalitatile aparute pe parcursul programului de lucru al laboratorului au fost cauzate in principal de:

- Lipsa unui numar adecvat de calculatoare racordate la SIUI al spitalului ;in prezent exista doar 2 calculatoare(unul la etajul 1 si altul la parterul laboratorului) disponibile pentru introducerea cererilor de analize si a rezultatelor acestora in SIUI
- Nerespectarea programului de receptiie a produselor patologice si de predare a

buletinelor de analiza, de catre personalul spitalului

-Achizitia tardiva a recipientelor necesare prelevarii produselor patologice ca si a unor reactivi pentru analizele de laborator, desi cererile de achizitionare din partea laboratorului au fost inaintate in timp util

- Prin lipsa sistemelor de aer conditionat in spatiile de lucru ale laboratorului , concomitent cu cresterile de temperatura specific e sezonului cald, alarma sonora a termostatului pentru culturi fungi, a intrat in functiune deranjand pacientii internati(in prezent s-au instalat 2 astfel de sisteme de aer conditionat, dar peste anumite anumite limite de temperatura pot fi afectate si celelalte aparate si echipamente din celelalte spatii de lucru ale laboratorului)

In luna Iunie a fost angajat prin concurs, un medic specialist in medicina de laborator

12.07.2013 Sef laborator

Dr. Rodica Fantanaru

Spital clinic boli infectioase

Laborator analize medicale

RAPORT LUNA SEPTEMBRIE

Total analize laborator	**35509**
Total Microbiologie I	**11613**

Comparativ cu luna Iulie:

Total analize au scazut de la 42.120 la 34.184

Comparativ cu luna August:

Total analize au crescut de la 42.120 la 35.509

In vederea acreditarii laboratorului nu s-au achizitionat echipamentele mici, frigidere, termometre, si nici control extern de calitate pentru microbiologie, parazitologie, citologie frotiu sanguine, etc

Unii reactivi pentu care spitalul a facut comanda , nu au fost furnizati de firme

Nu s-a identificat un spatiu pentru mutarea reactivilor din magazie in vederea efectuarii reparatiilor.

Au fost verificate impreuna cu consultantul RENAR, 14 proceduri generale
